

LAMILUX MODULAR SKYLIGHTS SUPPLIED PRE-ASSEMBLED TO GRP UPSTANDS

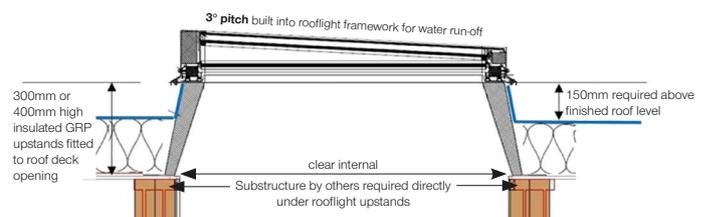

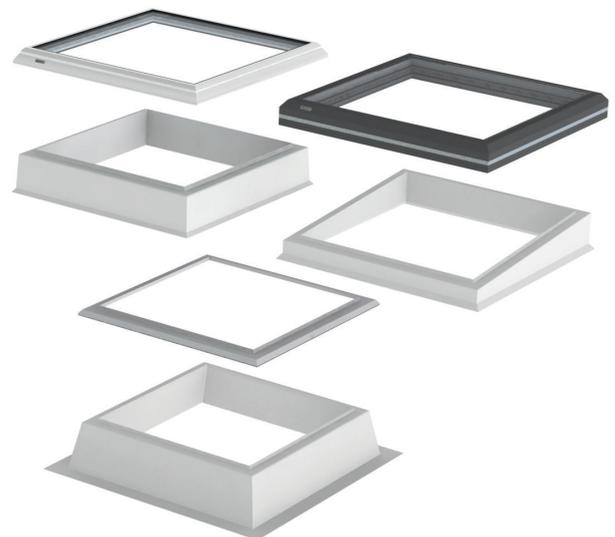

Our modular skylights can be supplied pre assembled to GRP upstands making them the perfect connection to a wide range of flat roof types. The upstand is a key component in the whole LAMILUX flat skylight system and makes installation quick and simple whilst saving costs of constructing timber upstands on site.

The airtight and watertight joint between the seamless upstand and the rooflight is made in our factory which removes interface problems which cause air leakage or water ensuring a guaranteed constant seal.

LAMILUX upstands are available for circular, square, pyramid and rectangular skylights in a wide range of standard sizes and are available in heights of 150mm, 300mm, 400mm or 500mm which means there is always a solution to have the required 150mm height above the finished roof level.

[If you are working on a project with skylight requirements click here to email me your request for our product specification and quotation.](#)

LAMILUX supply the most energy efficient flat roof skylights and atrium glass roofs in the industry. All our products are manufactured in a way that the framework is thermally separated and insulated resulting in unrivalled air-tightness, water-tightness and acoustic performances.
