LAMILUX announce market launch of the Modular Glass Skylight MS78

LAMILUX are proud to introduce the new Modular Glass Skylight MS78 – the pre-glazed single tier mono-pitch rooflight innovatively designed for combining outstanding daylight, simple installation and outstanding performance.

The LAMILUX Modular Glass Skylight MS78 is a thermally broken, mono-pitch rooflight that can be configured by forming a row of pre-fabricated modules, presenting architects and contractors with design flexibility and a product that is easy to specify and install.

The latest daylighting innovation from LAMILUX offers design freedom with installation available in roof pitch inclinations ranging from 5°-30°, and sizes varying according to design – with a maximum module size of 1.3m x 3m, and a total rooflight length of up to 20m. Each module, whilst uniformed in appearance, can be configured as a fixed panel, or as an integrated opening vent for natural ventilation with no restrictions on fixed/opening configurations.

The pre-glazed paneling system can be mounted directly on load-bearing surfaces which means there is no special concrete, wood or steel upstand requirements, enabling a simple installation and shorter lead times.

As with all LAMILUX products, the MS78 is manufactured in a way that the framework is thermally separated and insulated resulting in unrivalled air tightness, heat and sound insulation values. With a range of glazing options, optional roller shading and dual colour framework as standard, the thermally broken system combines daylight and heat control into your design.

PRESS RELEASE

September 2023

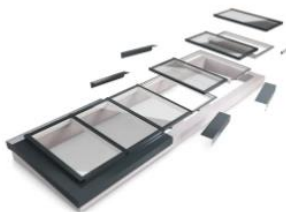

The official market launch of the Modular Glass Skylight MS78 by LAMILUX when customers can order the modular glass roof system and benefit from its numerous advantages is coming soon.

Until then, full specification of the new system is available by contacting LAMILUX at sales@lamiluxskylights.co.uk. Customers can also customise the Modular Glass Skylight MS78 using the interactive LAMILUX product configurator – designed to view and download bespoke technical drawings of the innovation. Early engagement with LAMILUX for your upcoming projects aids supporting your design development and adding value with expert specification advice, so please get in touch with LAMILUX early in the design stage to ensure they're instructed in good time.

Further information, with links to the product configurator is available at: <https://www.lamiluxskylights.co.uk/rooflights/modular-glass-skylight.html>
