

ROOFLIGHTS & ROOF GLAZING

Project reference

LAMILUX Continuous Barrel Vault Rooflight

School project York

The LAMILUX U.K Ltd installation team recently completed a school refurb project in York, where they installed an incredible 65 meter long X 2.4 meter wide LAMILUX Continuous Barrel Vault Rooflight.

Designed with 16 integrated single ventilation flaps, evenly spaced along the rooflight for natural ventilation, the Barrel Vault rooflight, was positioned above classrooms and communal areas to not only enhance natural daylight in the rooms below, but also provide natural aeration. Results from studies have proven that ventilation coupled with natural daylight will not only enhance the learning of the pupils in the classrooms, but also enhance the pupils health benefits with good indoor air quality.
