

ROOFLIGHTS & ROOF GLAZING

Project reference Kings Cross

System: TGL ISO
Louvre volume: 102
Completion date: 2018

The cast iron construction of the three Victorian gas holders has been restored. These form the framework of an exclusive apartment complex. Inside the property there are 145 apartments and 9 penthouse apartments with an associated roof terrace. At the point where the three cylindrical buildings meet, an impressive atrium was created, surrounded by circular walkways.
