LAMILUX launch latest innovations at ARCHITECT@WORK London, Level T1, Stand 49

More light. More air. More Innovations.

At Architect @ Work, London 2023, LAMILUX will be presenting its latest innovations from the comprehensive product portfolio of daylight and ventilation systems.

From 22 to 23 March 2023, the leading exhibition for architecture, will once again open its doors in London and numerous international exhibitors will present the latest trends and innovations alongside short hot topic seminars providing the opportunity for fellow architects to share their experiences. All exhibitors must present their innovations for approval to a judging panel of architects and interior designers before acceptance to exhibit, ensuring focus is on the latest designs in the industry. Among them is LAMILUX, the specialist for daylight systems, who will be bringing three of its latest products to life at Stand 49.

LAMILUX has made it its mission to make the world brighter, healthier and more sustainable with skylights and glass roofs designed for durability. At the leading exhibition Architect @ Work, LAMILUX will be presenting this claim with their latest designs:

The Glass Skylight F100 Circular is the ideal addition to flat roofs of residential and administrative or school building projects, bringing in daylight and natural ventilation with its hidden chain drives.

The new LAMILUX ventilation flap integrates almost invisibly into the glass roof surface of both the LAMILUX Glass Roof PR60, and also into all other mullion-and-transom systems for flat roofs available on the market. The new development which is optionally available with Passivhaus certification phA, also features outstanding design due to lowest roof clearance on the market, elegant design of the cover strips and flat water drainage and

March 8th 2023

a high variety of sizes, glazing and colours.

The Glass Skylight FE 3° is the flat aluminium framed modular skylight with a 3° inclination built into the framework for natural drainage of water and dirt. The new Smoke Lift version of the Glass Skylight FE combines all the advantages of the Glass Skylight FE with the safety features of an EN 12101-2 certified electrical smoke and heat exhaust ventilator.

You will find LAMILUX on Level T1 at Stand 49 where the LAMILUX team of experts will be on hand with their extensive technical knowledge.
